--> Comment Text :  
We are committed to providing a safe and efficient source of electricity to our customers while providing for the health and safety of the general public. All of the nuclear utilities have invested heavily and are relying on the Federal Government to honor its responsibility and commitment to provide a safe storage location for our spent fuel. Yucca mountain is an excellent location for this purpose and should be opened for accepting the spent fuel. We have studied this issue long enough.

R/Ken Elliott
